KEY TAKEAWAYS

- Documentary is both the highest-volume and highest-quality major genre — a clear content strength to lean into.
- Release volume nearly doubled from 2017 to 2020, but average rating slipped ~0.35 points over that span — growth may be outpacing quality control.
- Content is still heavily English-language (69%); Hindi and Spanish lead the non-English catalog, pointing to where localization has gained the most traction.
- Average runtime sits at 95.6 minutes, with Feature-length titles (~75–120 min) making up the majority (59%) of the catalog.
